US Manufacturing Content Declaration, and USMCA Compliances

Aubin Industries, Inc. products are all USA manufactured goods.

Aubin Industries, Inc. is a certified Disabled Veteran Small Business, 100% US manufacturer of industrial casters and wheels with the main production facility located in Tracy, CA.

On July 1st 2020 USMCA (T-MEC, CUSMA) replaced NAFTA.

Aubin Industries, Inc. meets the requirements of USMCA and certificates are available when required.

Our Raw materials such as aluminum, steel, and urethanes are also sourced from US manufacturers and recycled materials are used when possible.

Some of our sealed bearings come complete from USA Free Trade Agreements trading partners in Asia and other parts of the world. They are the only components of our products that are not US made. The monetary content of non-USA content is the minor portion.

If there is a contractual need for any particular certification on a certain part, please contact us for that with specifics. It is to be noted that all Aubin Industries, Inc. parts can be deemed made in the USA as only negligible assembly parts are outsourced.

What is the percentage of US made in these products?

The range of US content is typically estimated at 99.9% in all products.

Please bear in mind that the supply chain changes and raw materials are controlled by metal billet makers and scrap markets and at some point it is beyond any rational tracking capability.

Thank you for your faith and support of American made products.
